Education

Debreceen University
“Bachelor of Science”
Computer Science

Sep 2020 - Present

Relevant Projects

RF-LAB

<https://rf-lab.herokuapp.com/>

Debreceen, Hungary

Dec 2020 - May 2021

A Research paper + full-stack app using **TailwindCSS**, **Flask** & **SQLite/PostgreSQL** as a backend for collaborative physical penetration testing. The web application applies algorithms and data structures best practices.

PyBDD

https://github.com/MoElaSec/Python_Behave_Selenium_WebApp_Auto_testing

Debreceen, Hungary

June 2021

A CLI tool used to conduct a fully automated test for Web Applications using **Python Behave** (**Cucumber**) + **Selenium** + **Click**. Enabling Behavioral Driven Development (**BDD**).

Flask Blog

https://github.com/MoElaSec/Flask_Blog_Jira

Debreceen, Hungary

Oct 2020 - Dec 2020

I lead a team of two documenters and one developer to create a fast and robust public **Flask** blog that connects with **Jira** (issues, comments & stories etc.) using **JiraAPI** and documented with **Confluence**.

PyBots

<https://github.com/MoElaSec/Discord-Bots-List>

https://github.com/MoElaSec/Twitter_Bots_List

UAE & Hungary

Oct 2020 - Dec 2020

March 2021

Goal: To solve problems related to managing Twitter accounts and Discord channels.

Connecting to various games, weather, geolocation API & services to automate information gathering.

LOL Player Info Grabber

<https://github.com/MoElaSec/andriod-app-LOL-RiotAPI>

Dubai, UAE

summer 2017

An **Android** mobile application to pull League of Legend (LOL) player information (summoner, stats etc.) using **RIOT-API**.
